

Metal Finishing Index to Volume 90

January—December 1992

A

Abrasive blasting
of electroless nickel deposits, April 14
of inorganic "metallic" finishes, Feb. 33
internal flexible abrasive finishing tools and, July 46
in plastic blasting media problem determination, July 11
for stripping rejected parts, April 30
ABS graft specimens, metallization of, preliminary treatment with surfactants in, Mar. 29
Acrylic coatings
for automotive trim, Sept. 19
high-solids, Mar. 21
technical developments in, Feb. 15
AESF SUR/FIN '92, technical program and exhibits, June 21
AESF Week 1993, pollution prevention technologies addressed during, Dec. 49
Airline and Aerospace Finishing
Electroforming of Nickel Cerium Dioxide Composites, April 51
Electroless Nickels and Their Applications in the Aircraft Industry, April 13
Nondestructive Detection of Nonvisible Coatings, April 47
Silver Plating of Mux-Demux Filters, April 33
Alodine, detection of, April 47
Aluminum and aluminum alloys
in brush plating, April 17
chromium-free no-rinse precoat coatings on aluminum and galvanized steel, Sept. 29
in dielectrics, Mar. 45
electrodeposition of, Feb. 36
electroless nickel-phosphorus deposition on, July 36
electroless nickel plating of, April 14
hard anodic coatings on aluminum alloys, Dec. 19
high-durability powder for aluminum building profiles, Mar. 37
nickel strike for, July 56
pass/fail criteria after salt spray testing, Nov. 73
polyester, in clearance control coatings, Mar. 46
product showcase for, Oct. 19
stripping of chromium from, Jan. 65
treatment of an anodizing waste to water-quality-based effluent limits, Feb. 69
in wear-resistant coatings, Mar. 45
Annual Reviews
Technical Developments in 1991: Inorganic "Metallic" Finishes, Processes, and Equipment, Feb. 33
Technical Developments in 1991: Organic Coatings, Processes, and Equipment, Feb. 13
Anodes and accessories
anode baskets for alkaline zinc, Feb. 84
in pit-free nickel plating, May 16
Anodizing
anodizing dye for titanium, Oct. 58
black brass anodes, Dec. 57
conversion coating of titanium and its alloys using alternating current and, April 9
crystals in cyanide cadmium, Mar. 76

hard anodic coatings on aluminum alloys, Dec. 19
inorganic "metallic" finishes, Feb. 36
inspecting phosphoric acid anodize coatings, April 56
of Ni-P-B deposited mild steel plate, Jan. 17
nondestructive detection of nonvisible coatings, April 47
opaque anodize, Feb. 85
plate-and-frame heat exchangers in, May 54
pulse rectifiers in anodizing and plating, May 31
testing anodic sealing, May 57
treatment of an anodizing waste to water-quality-based effluent standards, Feb. 69
yellow anodes, Oct. 58
Antwerp Green finish, Mar. 76
Aqueous cleaning
as alternative to CFC and chlorinated solvent-based cleaning, Jan. 84, Feb. 98
impingement in, Aug. 39
for precision components, Aug. 17
Arsenic, in citrate gold, Sept. 64
Atomic absorption and emission techniques, in determination of metal in plating solutions, Oct. 54

B

Babbitt alloy, brush plating of, May 52
Barrel plating, of 52100 steel parts, Aug. 65
Bismuth, plating of, Sept. 65
Black smut, on high carbon steel and cast iron, Jan. 65
Bolts, coatings on, Oct. 42
Boron
in electroless nickel deposits, April 13
in nickel alloys, Jan. 15
nitride coatings produced on, Feb. 25
Brass
black brass anodes, Dec. 57
building hardware standard, Dec. 57
cyanide-free brass bath, April 55
fading dye, June 136
porosity of nickel-plated brass, July 56
silver plated on, Mar. 76
stains on, Jan. 65
Bright dip, analysis of, Nov. 75
Brighteners, new, for noncyanide alkaline zinc plating bath, Feb. 61
Bronze alloy, failed adhesion test and, Nov. 73
Brush plating
in-plant, April 17
job site, May 52
Buffing compound, removing, Sept. 65

C

Cadmium
aluminum connector backshells coated with, April 14
black spots on, April 56
brush plating of, May 52
cyanide, Mar. 76
determination of in plating solutions, Oct. 54
electrodeposition of, Feb. 37
pass/fail criteria after salt spray testing, Nov. 73
vacuum distillation for recovery of rinse water

and concentrated solutions in electroplating process, Nov. 47
Calcium stearate, removing, Sept. 65
Chlorinated solvents, replacement of, Jan. 84, Feb. 98, Aug. 13, Aug. 17
Chlorofluorocarbons, aqueous cleaning as alternative to use of, Jan. 84, Feb. 98
Chromate
aluminum connector backshells coated with, April 14
passivation treatment, in protecting silver-plated components from tarnishing, April 36
rubs off over zinc, Sept. 64
yellowing of, April 55
yellow, rust-colored staining, Dec. 56
in zinc electroplating processes, Mar. 15
Chromium
bright finish for cobalt-chromium alloy, Mar. 76
brown spots on, May 57
in brush plating, April 17
corrosion of chromium electrodeposits, June 113
Cr₃C₂ co-deposition in cobalt, Feb. 23
electrodeposition of, Feb. 37
fume suppressants, Feb. 84
hard chromium plating, May 35
hexavalent chromium removal from water using tailored zeolite, Nov. 37
in metal matrix composite materials, Feb. 24
plate, ban for, May 57
plate replacement, thermal spray coatings in, Mar. 47
in plating of shock absorbers, Sept. 64
plating on Inconel and, Aug. 65
stripping of from aluminum, Jan. 65
vacuum distillation for recovery of rinse water and concentrated solutions in electroplating process and, Nov. 45
yellow anodes and, Oct. 58
Cleaning and chemical surface preparation
black residue from cleaning, Dec. 56
black smut on high carbon steel and cast iron, Jan. 65
black spots on cadmium, April 56
brown spots on chromium, May 57
buffing compound removal, Sept. 65
calcium stearate removal, Sept. 65
carbonates in alkaline zinc baths, June 85
chlorinated solvent-based cleaning replacement, Jan. 84, Feb. 98
chlorofluorocarbon-based cleaning replacement, Jan. 84, Feb. 98
cleaning heat-treated parts, June 135
cleaning refresher course, July 34
cleaning welded joints, Sept. 64
corrosion resistance of iron phosphate coatings and the influence of accelerator choice, Aug. 27
coverage: a phosphating pretreatment problem, Aug. 51
dark spots on plated castings, Mar. 76
darkening after acid dip, Dec. 56
efficient use of aqueous cleaning for precision components, Aug. 17

Bronze alloy, failed adhesion test and, Nov. 73
Brush plating
in-plant, April 17
job site, May 52
Buffing compound, removing, Sept. 65

C

Cadmium
aluminum connector backshells coated with, April 14
black spots on, April 56
brush plating of, May 52
cyanide, Mar. 76
determination of in plating solutions, Oct. 54
electrodeposition of, Feb. 37
pass/fail criteria after salt spray testing, Nov. 73
vacuum distillation for recovery of rinse water

and concentrated solutions in electroplating process, Nov. 47
Calcium stearate, removing, Sept. 65
Chlorinated solvents, replacement of, Jan. 84, Feb. 98, Aug. 13, Aug. 17
Chlorofluorocarbons, aqueous cleaning as alternative to use of, Jan. 84, Feb. 98
Chromate
aluminum connector backshells coated with, April 14
passivation treatment, in protecting silver-plated components from tarnishing, April 36
rubs off over zinc, Sept. 64
yellowing of, April 55
yellow, rust-colored staining, Dec. 56
in zinc electroplating processes, Mar. 15
Chromium
bright finish for cobalt-chromium alloy, Mar. 76
brown spots on, May 57
in brush plating, April 17
corrosion of chromium electrodeposits, June 113
Cr₃C₂ co-deposition in cobalt, Feb. 23
electrodeposition of, Feb. 37
fume suppressants, Feb. 84
hard chromium plating, May 35
hexavalent chromium removal from water using tailored zeolite, Nov. 37
in metal matrix composite materials, Feb. 24
plate, ban for, May 57
plate replacement, thermal spray coatings in, Mar. 47
in plating of shock absorbers, Sept. 64
plating on Inconel and, Aug. 65
stripping of from aluminum, Jan. 65
vacuum distillation for recovery of rinse water and concentrated solutions in electroplating process and, Nov. 45
yellow anodes and, Oct. 58
Cleaning and chemical surface preparation
black residue from cleaning, Dec. 56
black smut on high carbon steel and cast iron, Jan. 65
black spots on cadmium, April 56
brown spots on chromium, May 57
buffing compound removal, Sept. 65
calcium stearate removal, Sept. 65
carbonates in alkaline zinc baths, June 85
chlorinated solvent-based cleaning replacement, Jan. 84, Feb. 98
chlorofluorocarbon-based cleaning replacement, Jan. 84, Feb. 98
cleaning heat-treated parts, June 135
cleaning refresher course, July 34
cleaning welded joints, Sept. 64
corrosion resistance of iron phosphate coatings and the influence of accelerator choice, Aug. 27
coverage: a phosphating pretreatment problem, Aug. 51
dark spots on plated castings, Mar. 76
darkening after acid dip, Dec. 56
efficient use of aqueous cleaning for precision components, Aug. 17

how to clean up in surface finishing, June 109
 hydrogen embrittlement testing, Sept. 65
 impingement: the key to effective aqueous cleaning, Aug. 39
 low emission solvent cleaning, Aug. 31
 metal determination in plating solutions by atomic absorption and emission techniques, Oct. 54
 multi-tank ultrasonic cleaning systems, May 7
 of inorganic 'metallic' finishes, Feb. 33
 removing silicone, June 136
 replacement of chlorinated solvents for in-line preplate metal cleaning with environmentally sound alternatives, Aug. 13
Cobalt and cobalt alloys
 bright finish for cobalt-chromium, Mar. 76
 brush plating of, May 52
 electrodeposition of, Feb. 38
 electroless plating of, Feb. 41
 in electroplating process, Mar. 15
 internal stress in electrodeposited, Nov. 61
 nickel strike baths used on, Jan. 42
 in thermal spray coatings, Mar. 45
Conversion coatings
 conversion coating of titanium and its alloys using alternating current, April 9
 nonchromium, April 47
 pass/fail criteria after salt spray testing, Nov. 73
 processes and equipment in production of, Feb. 41
Copper and copper alloys
 alkali depletion in cyanide and, July 56
 in aluminum finishing, July 56
 brush plating of, May 52
 controlling full-build electroless copper, Jan. 21
 copper strike bath applications, Jan. 42
 in cyanide-free brass bath, April 55
 electrodeposition of, Feb. 37, June 125
 electroless nickel plating of, April 14
 electroless plating bath for deposition of gold on, Jan. 33
 electroless plating of, Feb. 40
 failed adhesion test and, Nov. 73
 nickel and copper contamination effects on adhesion, Jan. 46
 nickel plating of copper panels, Mar. 48
 porosity of nickel-plated brass and, July 56
 strike bath applications, Jan. 42
 stripping tin from copper, Nov. 73
 ultrasonic agitation effect on electroplating of at room temperature, Oct. 23
 vacuum distillation for recovery of rinse water and concentrated solutions in electroplating process and, Nov. 46
Corrosion resistance
 of aluminum and steel alloys, Nov. 73
 of amorphous nickel alloys, Jan. 15
 in anodizing, May 33
 chromium electrodeposits, June 113
 of electroless nickel deposits, April 14
 of gold jewelry, June 135
 of iron phosphate coatings, Aug. 27
 of phosphate coatings, Oct. 15
 of superalloys, Feb. 23
 thermal spray coatings for, Mar. 47
 of titanium and titanium alloys, April 10
 of zinc alloys, Mar. 15, June 87
 of zinc plate, Oct. 58
Cyanide
 alkali depletion in, July 56
 cadmium, Mar. 76
 dark spots on plated castings caused by, Mar. 76
 elimination, vacuum distillation for recovery of rinse water and concentrated solutions in

electroplating process, Nov. 46
 in gold plating systems, Mar. 25
 in zinc and zinc alloy plating, Mar. 15

D

Decorative coatings, new trends in, Dec. 7
Dielectrics
 applications of, Mar. 45
 metallization of, preliminary treatment with surfactants in, Mar. 29
 Diffusion dialysis, acid recovery with, Nov. 21
 Displacement deposition, on surface of metal, equations for, Jan. 33

E

Electrochemical impedance spectroscopy, in evaluation of phosphate coatings, Oct. 15
Electroforming
 in electrocomposite production, Feb. 23
 of inorganic 'metallic' finishes, Feb. 41
 of nickel-cerium dioxide composites, April 51
 passivating solution for, Nov. 75
Electroless plating
 chemical reduction in, in amorphous nickel alloy production, Jan. 15
 controlling full-build electroless copper, Jan. 21
 electroless nickel and gold plating on titanium alloys for space applications, July 23
 electroless nickel-phosphorus deposition on aluminum: interface and internal stress, July 36
 electroless nickel-phosphorus deposits after crystallization, Nov. 13
 electroless nickels and their applications in the aircraft industry, April 13
 fifty years of electroless nickel plating, May 25
 of inorganic 'metallic' finishes, Feb. 40
 of iron, Mar. 76
 kinetics of autocatalytic gold plating with dimethylamine borane, June 79
 layered electroless nickel, Oct. 58
 of nickel, Mar. 29
 novel biogenic nickel source for, Mar. 9
 poor adhesion on electroless nickel, July 56
 PVC tank liner evaluation for electroless nickel plating, May 45
 reducer in electroless nickel, Nov. 73
 solidification system for metal-finishing wastes, Nov. 9
 stress of high phosphorus electroless nickel deposits, June 103
 tanks for electroless nickel, June 135
Electrolytes
 in conversion coating of titanium and its alloys using alternating current, April 9
 in nickel plating, Mar. 48, May 16
 in zinc electroplating, Mar. 15
 in zinc-nickel electroplating system, June 87
Electronics Finishing
 Controlling Full-Build Electroless Copper, Jan. 21
 'Electroless' or Autocatalytic Gold Plating, Jan. 33
 New Palladium Strike Improves Adhesion and Porosity, Jan. 42
 Electronic variable speed drives, in mass finishing, Mar. 19
Electropolishing
 brighter, Feb. 85
 bright finish for cobalt-chromium alloy, Mar. 76
 of inorganic 'metallic' finishes, Feb. 36
 of titanium, Aug. 65
 'Emetal' process, patent for, Feb. 85
 Environmental Focus (column)

CWA reauthorization, Nov. 31

F

Filtering, in quality control, Dec. 42
Finishing Equipment
 Automated Laser Paint Stripping, May 48
 Evaluation of PVC Tank Liners for Electroless Nickel Plating, May 45

 More on Plating in Holes, Sept. 41
 Ten Suggestions for Job-Shop Platers, Nov. 53
 Why Plating in Holes is Impossible and Other Well-Known Misconceptions, Aug. 23

G

Germanium, plating on, April 55
Gold
 arsenic in citrate gold, Sept. 64
 autocatalytic plating process for, Jan. 33
 brush plating of, May 52
 buffering gold baths, Sept. 64
 complex ions, in electroless gold baths, Jan. 34
 corrosion tests for gold jewelry, June 135
 electrodeposition of, Feb. 38
 electroless nickel and gold plating on titanium alloys for space applications, July 23
 electroless plating of, Feb. 40
 kinetics of autocatalytic gold plating with dimethylamine borane, June 79
 plating, of niobium-titanium alloy, June 136
 plating systems, trench used in, Mar. 25
 selective gold plating on stainless steel components for space applications, Aug. 59
 strike bath, used as preplate, Jan. 42
 Good Days and Bad Days (column)
 Alphabet Soup, Jan. 48
 People in Finishing: Consultants, July 21
 People in Finishing: In-Plant Brush Plating, April 17
 People in Finishing: Jewelry Finishers, Part I, Aug. 47
 People in Finishing: Jewelry Finishers, Part II, Sept. 13

H

Heating and cooling

cleaning heat-treated parts, June 135

heat in brush plating process, April 17

heat resistance testing, of silver-plated Invar satellite components, April 37

plate-and-frame versus prime-surface heat exchangers, May 54

High-solids coatings

new developments in, Mar. 21

volatile organic compound reduction or elimination in, Mar. 37

High-velocity oxy/fuel, as thermal spray process, Feb. 30

Hot dipping

of inorganic 'metallic' finishes, Feb. 42

stripping tin from copper and, Nov. 73

Hull cell

in calculating throwing power, Oct. 50

in nickel plating, Mar. 48, June 87

Hydrogen

in conversion coating of titanium and its alloys using alternating current, April 9

embrittlement, April 17, Sept. 65

in zinc-nickel electroplating system, June 87

I

Inconel, plating on, Aug. 65

Indium, brush plating of, May 52

Initials dictionary, of finishing terminology, of environmental regulation terminology, Jan. 48

Inorganic 'metallic' finishes, processes and equipment in production of, Feb. 33

Invar alloy, in mux-demux filters, April 33

Ion exchange technology, applications of in pollution prevention, Nov. 25

Ion vapor deposition, of inorganic 'metallic' finishes, Feb. 39

Iridium, brush plating of, May 52

Iron and steel

barrel plating of 52100 steel parts, Aug. 65

black smut on high carbon steel, Jan. 65

blistering zinc deposit and, Nov. 73

chromium-free no-rinse prepaint coatings on aluminum and galvanized steel, Sept. 29

corrosion resistance of iron phosphate coatings, Aug. 27

electroless nickel-phosphorus deposits after crystallization and, Nov. 13

electroless nickel plating of steel, April 14

heat exchanger for passivating solution and, Nov. 75

iron alloy, in electroplating process, Mar. 16

iron alloy, in mux-demux filters, April 33

iron displacement with copper in acidic copper sulfate solution, Jan. 33

iron in precipitation of mercury from wastewater, Jan. 65

pass/fail criteria after salt spray testing and, Nov. 73

selective gold plating on stainless steel components for space applications, Aug. 59

stripping of nickel plate from, Nov. 75

yellow, rust-colored staining, Dec. 56

J

Jet-vapor deposition, of single and

multicomponent thin films, Dec. 37

Just-in-Time (JIT) requirements, for mass finishing, Mar. 18

K

Kenmore process, for wire-rod plating, April 39

Kesternich testing

corrosion resistance tests conducted using, May 33, June 87

zinc-cobalt alloy performance in, Mar. 16

Ketones, in high-solids coatings, Mar. 22

Kure beach corrosion test, for chromium, June 113

L

Laser paint stripping, automated, May 48

Lead

coating lead weights, Dec. 56

vacuum distillation for recovery of rinse water and concentrated solutions in electroplating process and, Nov. 46

M

Malcolm Baldrige Award

criteria for, Dec. 33

guidelines for benchmarking established by, Jan. 30

ISO 9000 quality criteria and, Mar. 56, April 26

FINISHING BOOKS FROM METAL FINISHING

ELECTROPLATING OF ZINC DIE CASTINGS

by S.K. Jalota

225 pages hardcover \$85.00

This book provides a comprehensive coverage of plating on zinc die castings starting with design and production with emphasis on its relation to plating. Subsequent chapters treat polishing, buffing and mass finishing, cleaning and pretreatment and the equipment for plating. The balance of the book runs the gamut of the various metals that can be deposited. Each chapter devotes a portion to troubleshooting-causes of defects and remedies. Concluding chapters concern coloring, lacquering, stripping of deposits and analysis and testing.

ZINC PLATING

by H. Geduld

360 pages hardcover \$100.00

This book contains 15 chapters including a history, cleaning procedures, equipment and plant layout, cyanide, zincate and acid baths, post plate treatments, troubleshooting, special operations such as mechanical and strip and wire continuous processing, control of solutions and waste treatment. It is a practical volume written for the practitioner and chemist.

THE SURFACE TREATMENT AND FINISHING OF ALUMINUM AND ITS ALLOYS, 5th Edition

by S. Wernick, R. Pinner and P.G. Sheasby

1273 pages hardcover \$222.00

This is the classic work of reference on the subject and should meet requirements of designers, engineers, anodizers and others concerned with the finishing of aluminum. The work is in two volumes and covers every conceivable aspect of aluminum treatment.

ELECTROPLATING ENGINEERING

HANDBOOK, 4th Edition

by L.J. Durney

790 pages hardcover \$97.00

This standard handbook for electroplating engineers consists of two parts, as in earlier editions. The first part provides general processing data such as metal preparation, testing and troubleshooting. The second part comprises engineering fundamentals and practice.

MODERN ELECTROPLATING

by L. Lowenheim

801 pages hardcover \$95.00

This is the third Edition of this valuable textbook. Numerous authorities have contributed summaries on the principles of plating and metal finishing, control, maintenance, deposit properties and troubleshooting.
